(413)577-1952

During the four-week mixed residential and commuter program, in July 2016, up to 20 participants (rising 10th – 12th graders) will be exposed to selected topics in all modes of transportation via invited talks, team projects, field trips, along with academic enhancement and recreational activities.

The Summer Transportation Institute highly encourages participation from women, minorities, and students with disabilities.
